WS-06	Data Scientist Work	10.0.0.16/28	Windows 11	Medium	🟢

Assistant

Command mode

Asset Inventory & CIA - Command Mode

Available commands:

/explore

+ Discover organizational subnets

/assess

+ Scan a subnet and discover hosts

/setstatus

+ Set host status (Active / Not Active / Unknown)

/assignroles

+ Detect server roles and assign CIA

/details

+ Show detailed host information

/train

+ Train the ML role prediction model

/delete

+ Remove a host from the table

/submit

+ Submit Asset Inventory & CIA results

/reset

+ Clear the inventory table

/exit

+ Exit assess mode

/commands

+ Show all available commands

/help

+ Explain this section

Tip: Use /explore first, then /assess.

Type a command (e.g., /help)...

Send

Command mode: /explore /assess /setstatus /assignroles /details /train /delete /submit /reset /exit /commands /help

Main Parts Explained

1 Navigation Rail

- Shows the audit lifecycle with the current step highlighted.
- Supports quick movement between related audit stages.

2 Audit Scope Header

- Confirms the active audit package, asset count, and completion state.
- Keeps inventory work aligned to the selected audit boundary.

3 Inventory Workspace

- Combines summary cards with the working inventory table.
- Supports host review, role validation, and CIA classification.

4 Assistant Panel

- Shows commands for discovery, role assignment, details, and submission.
- Guides the user through the page workflow in one screen.

This page is the operational source for asset discovery, CIA classification, and inventory completeness.
