

ISO 27001 Audit Readiness Dashboard

Dashboard Snapshot

Visual overview used for audit coordination, status tracking, and evidence planning.

Main Parts Explained

1 Navigation Rail

- Maps the end-to-end ISO 27001 workflow.
- Supports fast movement between lifecycle steps.

2 Audit Scope

- Defines the active audit package and in-scope population.
- Keeps downstream metrics aligned to one audit boundary.

3 KPI Summary

- Summarizes readiness, evidence, risk, and SoA completion.
- Useful for quick leadership updates.

4 Lifecycle Status

- Shows completed stages versus work still in progress.
- Color cues spotlight the remaining actions.

It unifies scope, evidence, risk, and control progress in one operational view. That makes it useful for daily execution and concise readiness reporting.
