Main Parts Explained

1 Navigation Rail

- Shows the audit lifecycle with the current step highlighted.
- Supports quick movement between related audit stages.

2 KPI Indicators

- Highlights the current vulnerability and threat totals for the selected scope.
- Helps users see workload and exposure before reviewing the full table.

3 Threat Analysis Table

- Shows CVEs selected from assessed asset roles and exposed services.
- Uses ML role context to align threats and host prioritization.

4 Assistant Panel

- Shows commands for assessment, details, reset, and submission.
- Guides the user through the threat workflow in one screen.

This page is the operational source for vulnerability review, threat visibility, and host prioritization.
